Period for Reply

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 18 August 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10 and 20-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,633,178. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-10 and 20-39 of the instant application essentially comprise the same features as in claims 1-30 of U.S. Patent No. 6,633,178.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5, 20, 24, 30, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Garlepp et al. (U. S. PAT. 6,198,307).

In claims 1 and 5, Garlepp et al. teaches all claimed features in Fig. 7, a method comprising:

a) driving a first current ( $I_1$ ) when  $M_p$  turned on and  $C_p$  fully charged) through a line (10) and a termination resistance ( $R_s$ ) so that a logical value (0/1) on said line changes from a first logical value (logic low) to a second logical value (logic High); and

b) holding said second logical value (logic high) on said line by driving a second current ( $I_2$ ) through said line and said termination resistance, said second current less than said first current (due to leakage current through  $M_n$ ); wherein said first and second currents flow in a direction from said termination resistance ( $R_s$ ) into said line (10).

Apparatus claims 20 and 24 are essentially the same in scope as method claims 1 and 5, respectively. Therefore, they are rejected in the same manner.

Apparatus claims 30 and 34 are essentially the same in scope as method claims 1 and 5, respectively. Therefore, they are rejected in the same manner.

5. Claims 11-19 appear to comprise allowable subject matter.
